This collection of information is required by 37 CFR 1.5. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 2 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Office, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, ALEXANDRIA, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Patent Number: 6,740,183  
Issued: May 25, 2004  
Name of Patentee: Segawa et al.  
Title of Invention: METHOD OF PRODUCING CERAMIC MULTI-LAYERED SUBSTRATE

**REQUEST FOR RECONSIDERATION UNDER 37 C.F.R. § 1.322**

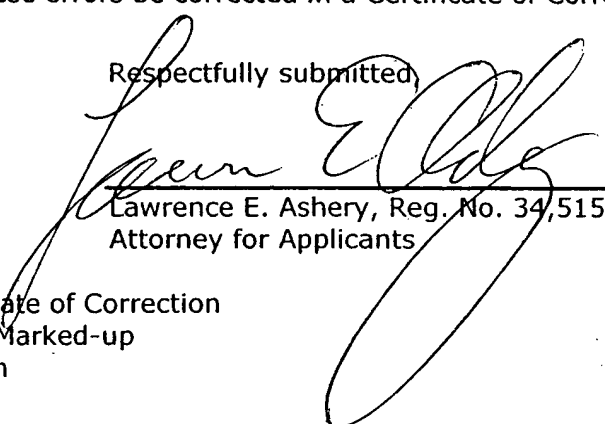

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

This Request is being filed to request consideration of a Request for Certificate of Correction which was previously filed on November 4, 2004 (copy enclosed).

The Request for Certificate of Correction states that there are errors on the title page, in the Abstract. The Abstract should read as amended in the Marked-up Copy of Specification Showing Additions and Deletions (copy enclosed).

It is respectfully requested that these errors be corrected in a Certificate of Correction.

Respectfully submitted,

  
Lawrence E. Ashery, Reg. No. 34,515  
Attorney for Applicants

**METHOD FOR MANUFACTURING A MULTI-LAYERED CERAMIC  
SUBSTRATE****FIELD OF THE INVENTION**

5 The present invention relates to the field of methods for manufacturing a multi-layered ceramic substrate used for electronic devices, and in particular to methods for manufacturing a ~~so-called~~ non-shrinkable multi-layered substrate which greatly suppresses shrinkage of the substrate during firing.

**BACKGROUND OF THE INVENTION**

10 Normally, multi-layered ceramic substrates are manufactured using a method called the green sheet lamination method. In this method, green sheets, made by forming a slurry containing ceramic powder and organic binder into a sheet, are punched (for holes) and screen printed with conductive paste. These  
15 green sheets are stacked to the required number, press-heated to laminate the layers, and then fired.

The advantages of this method include the feasibility of fine pattern printing realized by the extremely flexible green sheet and good permeability to organic solvents, and good surface smoothness and air-tightness which allow the  
20 lamination of even up to several dozens of layers.

On the other hand, the main disadvantage is the difficulty in achieving dimensional accuracy. This is due to shrinkage of the ceramic substrate accompanied by sintering which occurs during firing~~it~~. Inaccurate dimensions cause mismatching between components and conductive patterns, generating the  
25 serious problem of inability to mount semiconductor chips such as CSPs (chip size packages) and MCMs (multi-chip modules) with high accuracy.

**ABSTRACT OF THE DISCLOSURE**

A method for manufacturing a multi-layered ceramic substrate which enables the removal of to remove a shrinkage suppression sheets without damaging the multi-layered substrate. The shrinkage suppression sheets is are formed on both  
5 faces of unfired laminated green sheets, and then the laminated green sheets are fired. ~~For removing the shrinkage suppression sheets on both faces of the multi-layered ceramic substrate 2 after sintering, water~~ Water, ceramic powder, or a water and ceramic powder mixture is sprayed, together with compressed air, onto the shrinkage suppression sheets, on both faces of the multi-layered ceramic substrate,  
10 after sintering, for to removal of the shrinkage suppression sheets.
